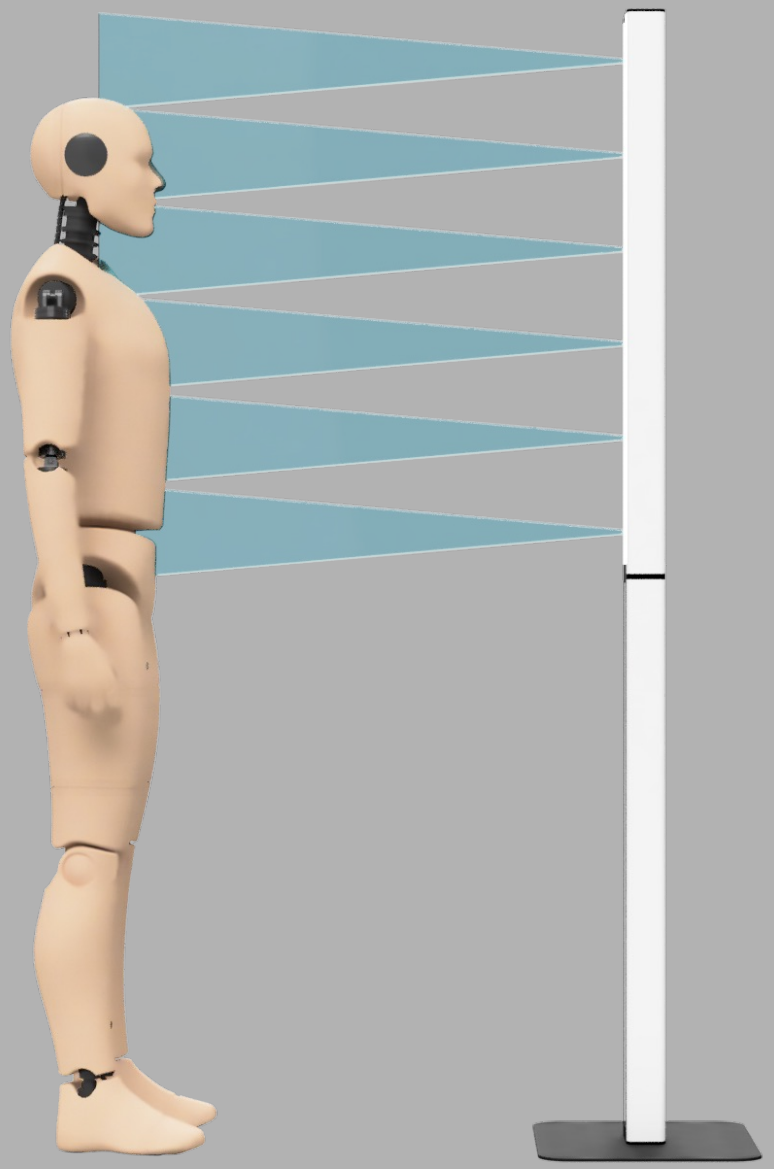
ICAO proof



The FaceSnap multicam solution automatically selects the best camera based on the position of the head, taking into account the angle of the head relative to the camera.

A high-resolution photo is then taken with the selected camera. The photo is immediately checked against ICAO standards.
ICAO checks:

- Eye detection
- Eyes open / closed
- Red eyes
- Mouth open / closed
- Glasses
- Head wear
- Lighting
- Background erasing
- Max angle + or – 5 degrees

GRIDLER
